

ALUMNI SPOTLIGHT: Christina M Sigismondi

Northeast Assurance Senior at EY

Christina Sigismondi is a 2016 graduate of the University at Albany. Her ABLE membership began in the Fall semester of her freshman year. The following semester, she was chosen to be Community Service President and from there had worked her way up to Vice President. She was President of the organization for the duration of her senior year, from Fall 2015 - Spring 2016. Christina believes that ABLE has contributed to shaping her into a professional, and has taught her necessary skills that she uses to this day as an auditor at EY.

During her undergraduate career, Christina majored in accounting with a minor in business administration. From there, she went on to obtain a Master's of Science degree in Professional Accountancy. Even though Christina has been in the workforce for a few years now, she still reflects on her time in ABLE, as she compares her auditing meetings to a Tuesday night Shark Tank event that ABLE has used as a tool to help its members develop a variety of skills. When asked about the club's impact on its members, Christina stated that "ABLE has been leading the way students develop and obtain real-life business and professional knowledge and has continued to prove itself as one of the most valuable and honorable organizations on campus through their community service, professional, social and fundraising efforts."

Christina specifically thanks Jason Cotugno for his endless efforts in "mentoring and supporting this ever-growing organization." The current ABLE E-Board members would like to thank her for acknowledging our dedication to improving the club each year. We appreciate her support and the support of all ABLE alumni as we continue to grow and develop as not simply an organization, but an ABLE family.
